

FCSIC

2025 Annual Report

WHO WE ARE

The Farm Credit System Insurance Corporation (FCSIC) is a U.S. government-controlled corporation whose primary purpose is to insure the timely payment of principal and interest on insured debt obligations issued by Farm Credit System (System) banks. As of January 1, 2026, FCSIC insured repayment of about \$482.7 billion in System debt securities and managed an Insurance Fund of about \$8.6 billion.

The Farm Credit System is a nationwide government-sponsored enterprise of privately owned banks and affiliated associations that serve agricultural borrowers and rural communities. System banks jointly issue debt securities (insured by FCSIC) to finance the System's loans, leases, and operations.

If a Farm Credit bank is unable to make a payment to investors on a Systemwide debt security, FCSIC will pay investors out of its Insurance Fund. Since FCSIC became operational in 1993, no System bank has defaulted on its insured debt obligations, and therefore FCSIC has never paid an insurance claim. The Farm Credit Insurance Fund managed by FCSIC is a United States government fund maintained for the benefit of taxpayers and investors in System debt securities.

Other FCSIC responsibilities include:

- *Managing the Farm Credit Insurance Fund*
- *Assessing and collecting annual premiums needed to maintain the Insurance Fund at the statutorily required amount*
- *Serving as receiver or conservator of a System institution when appointed by the Farm Credit Administration*
- *Providing discretionary financial assistance to a System institution under statutorily authorized conditions*
- *Minimizing the Insurance Fund's exposure to potential losses by actively monitoring and assessing insurance risk*
- *Regulating "golden parachute" payments made by troubled System institutions*

By protecting Farm Credit System investors, FCSIC helps ensure a stable and competitive source of credit for America's farmers, ranchers, and rural communities.

April 15, 2026

Dear Mr. President and Mr. Speaker:

The Farm Credit System Insurance Corporation is pleased to submit its annual report for calendar year 2025. This report highlights our role as the independent federal government-controlled corporation established to insure the timely payment of principal and interest to investors in insured Farm Credit System debt securities.

The balance in the Farm Credit Insurance Fund as of December 31, 2025, was \$8.6 billion. In 2025, we earned \$403.9 million in insurance premiums from Farm Credit System banks and \$303.4 million in investment income. In 2026, we expect to incur \$5.6 million in operating costs.

FCSIC is proud of the role we play in supporting the safety and soundness of the Farm Credit System, and we are committed to faithfully fulfilling our mission.

Sincerely,

Glen R. Smith
Chairman

The President of the United States Senate
The Speaker of the United States House of Representatives

MESSAGE FROM THE CHAIRMAN

I am pleased to present the 2025 Annual Report of the Farm Credit System Insurance Corporation. It is gratifying to note that, for the 36th consecutive year since we began issuing financial statements, our independent public auditor has issued unmodified or unqualified opinions on those statements.

The enclosed opinion letter indicates that the financial statements of the Farm Credit Insurance Fund, of which we are stewards, are fairly and accurately presented. The letter also indicates that we maintained effective internal control over financial reporting in 2025.

FCSIC's net income for 2025 was \$702.5 million, compared with \$624.1 million for the previous year. The Insurance Fund balance as of December 31, 2025, was \$8.6 billion, compared with \$8.0 billion at year-end 2024 (see Table 1).

FCSIC collects annual insurance premiums from insured Farm Credit System banks as necessary to achieve a statutory "secure base amount." Revenue from insurance premiums paid by Farm Credit System banks was \$403.9 million for 2025, compared with \$376.0 million for 2024.

In accordance with our governing statute, in March 2025, FCSIC refunded approximately \$76.6 million to the insured banks, representing excess premiums above the required secure base amount. This refund was made upon the FCSIC's Board's determination that the excess funds would not be needed for insurance purposes during 2025. Similarly, in February 2026, the FCSIC Board refunded approximately \$223.9 million to the insured banks for the excess premiums above the secure base amount that were collected for 2025.

In 2025, interest income generated through FCSIC's investment of its Insurance Fund totaled \$303.4 million, compared with \$252.8 million in 2024. When premiums were set in 2025, the year's estimated investment income allowed us to reduce the amount FCSIC needed to charge insured banks by about 7 basis points. Likewise, investment income in 2026 is expected to be over \$330 million, which reduces the amount needed to charge the banks in premiums by about 8 basis points. Since 2024, the premium accrual rates have been held consistent at 10 basis points.

As required by the Federal Managers' Financial Integrity Act of 1982, our management assesses FCSIC's internal controls annually. The 2025 assessment found that our internal controls over financial reporting comply with the standards prescribed by the U.S. Government Accountability Office. The assessment also provided reasonable assurance that our program objectives are being met.

FCSIC also continued to operate as efficiently as possible with a small core staff of 10 employees, keeping our operating costs about 6 basis points (0.06%) of our average assets.

We will continue to carry out our mission in 2026 by working hard to achieve our strategic goals and objectives. We are mindful of our public trust and will ensure that investors, Congress, the Farm Credit System, and other regulatory agencies receive timely and accurate information on issues concerning the Insurance Fund.

Sincerely,

Glen R. Smith
Chairman

BOARD OF DIRECTORS

The Farm Credit System Insurance Corporation is managed by a three-member board of directors comprising the same three individuals who make up the Farm Credit Administration (FCA) board. However, the same member may not serve as chairman of both entities. FCA is the independent federal agency responsible for the regulation and examination of the Farm Credit System.

As of April 15, 2026, the FCSIC board of directors has two members: Chairman Glen R. Smith and Board Member Jeffery S. Hall. Board Member Vincent G. Logan retired from federal service on March 31, 2025.

GLEN R. SMITH

Glen R. Smith was elected Chairman of the FCSIC Board of Directors on January 22, 2025. He has been a member of the FCSIC and Farm Credit Administration Boards since his appointment by President Donald Trump in December 2017. He also served as FCA Board Chairman and CEO from July 17, 2019, until October 21, 2022.

Mr. Smith is a native of Atlantic, Iowa, where he was raised on a diversified crop and livestock farm. His farm experience started at a very early age, after his father was involved in a disabling farm accident. He graduated from Iowa State University in 1979 with a Bachelor of Science in agricultural business and accepted a position with Doane Agricultural Services as state manager of the company's farm real estate division.

In 1982, Mr. Smith and his wife, Fauzan, moved back to his hometown and started farming and developing his ag service business. Today, their family farm, Smith Generation Farms Inc., has grown to encompass about 2,000 acres devoted to corn, soybeans, hay, and a small beef cow herd.

Mr. Smith is founder and co-owner of Smith Land Service Co., an ag service company that specializes in farm management, land appraisal, and farmland brokerage, serving about 30 Iowa counties. From 2001 to 2016, he was also co-owner and manager of S&K Land Co., an entity involved in the acquisition, improvement, and exchange of Iowa farmland. Mr. Smith has served on numerous community, church, and professional boards. He was elected to the Atlantic Community School Board of Education on which he served for nine years.

In 1990, he earned the title of Accredited Rural Appraiser from the American Society of Farm Managers and Rural Appraisers. In 2000, he served as president of the Iowa chapter of that organization. He is a lifelong member of the Farm Bureau, Iowa Corn Growers Association, Iowa Soybean Association, and Iowa Cattlemen's Association.

The Smiths have four grown children and six grandchildren. Three of their children are involved in production agriculture. Their son Peter has assumed managerial responsibilities for both the family farm and business.

JEFFERY S. HALL

Jeffery S. Hall was appointed to the FCA board on March 17, 2015, and was named board chairman and CEO by President Donald Trump on January 20, 2025.

Chairman Hall also serves as a member of the board of directors of the Farm Credit System Insurance Corporation (FCSIC), an independent U.S. government-controlled corporation that insures the timely payment of principal and interest on obligations issued jointly by Farm Credit System banks. He served as chairman of the FCSIC board of directors from November 29, 2016, until his designation as chairman of the FCA board.

Chairman Hall was raised on a family farm in southern Indiana that has been in his family for more than 200 years. A graduate of Purdue University, he has extensive experience in public service and agriculture.

From 1988 to 1994, Chairman Hall was a senior staff member in the office of U.S. Senator Mitch McConnell. He was appointed the head of the USDA's Farm Service Agency in Kentucky, where he was responsible for farm program and farm loan program delivery and compliance. He was assistant to the dean of the University of Kentucky College of Agriculture, where he managed a statewide economic development initiative agricultural project.

Over a career of more than 30 years in agriculture, Chairman Hall has held leadership positions in several nonprofits, including the Kentucky Agricultural Council, the Agribusiness Industry Network, the Louisville Agricultural Club, the Kentucky Agricultural Water Quality Authority, and the Governor's Commission on Family Farms.

Chairman Hall's priority as FCA chairman and FCSIC board member is to keep the Farm Credit System safe and sound and a dependable source of credit for all eligible borrowers.

2025 HIGHLIGHTS

Continued Focus on Efficient Operations

To operate efficiently, FCSIC employs a small staff of highly skilled employees to manage core functions while relying on private and public-sector contractors for support services. FCSIC also relies on effective collaboration with federal partners such as the Farm Credit Administration and the Federal Deposit Insurance Corporation in fulfilling its mission.

When FCSIC became operational in 1993, it insured approximately \$53 billion in debt and managed approximately \$488 million in its Insurance Fund — while employing 9 people. In 2025, FCSIC insured approximately \$483 billion in debt and managed approximately \$8.6 billion in its Insurance Fund — while employing 10 people.

FCSIC does not receive annually appropriated taxpayer money from Congress. Instead, its administrative expenses are paid from the Insurance Fund, which is replenished with insurance premiums paid by System banks and interest earned on FCSIC's Insurance Fund investments. In 2025, FCSIC spent about \$4.8 million in administrative expenses (up slightly from about \$4.7 million in 2024), meaning that operating costs for 2025 were about 6 basis points (.06%) of total assets. FCSIC earned enough in interest income during the first week of 2025 to cover all of its annual operating expenses.

Continued Focus on Robust Internal Controls

As stewards of over \$8 billion in U.S. government funds, FCSIC strongly emphasizes financial management with a robust internal controls environment. For the 36th consecutive year, FCSIC received an unqualified or unmodified opinion on its financial statements from an external auditor. FCSIC also received an opinion from the external auditor stating that FCSIC maintained effective internal controls over financial reporting. Additionally, during 2025 FCSIC engaged other external accounting experts to review and confirm the effectiveness of internal controls and processes as part of its annual review for compliance with the Federal Managers Financial Integrity Act (FMFIA). In addition to these reviews, as a significant reporting entity due to the size of its Insurance Fund, FCSIC's financial information is combined into the Consolidated Financial Statements of the United States and audited by the Government Accountability Office.

See FCSIC's management assurances statement on page 34 for further information about management's assessment of internal controls during 2025.

Increased Earnings on Insurance Fund Investments Resulting in Reduced Costs to the Farm Credit System

In 2025, FCSIC earned approximately \$303 million on its investments, compared to approximately \$253 million in 2024 (a 20% increase). The \$303 million also represents a 369% increase from FCSIC's 2020 investment earnings of approximately \$65 million. FCSIC's expected 2025 investment income allowed FCSIC to charge System banks a premium assessment rate that was 7 basis points lower than it otherwise would have been without these investment

earnings. FCSIC also returned approximately \$77 million in excess premiums to System banks in 2025.

FCSIC employs a five-year bond ladder strategy for its investments which has produced higher and more stable yields. This approach should allow FCSIC to subsidize premium assessments for the next several years.

Additional information on FCSIC's investments can be found on page 23.

Enhancement of Risk Management Tools

During 2025, FCSIC worked with actuarial experts to enhance the analytical tools used to assess the sufficiency of the Insurance Fund. As part of the enhancement, FCSIC updated key modeling assumptions using new, more granular data.

In addition to its annual assessment of Insurance Fund adequacy, FCSIC developed new ways to use its models to analyze other risks relevant to the System. FCSIC's risk management team maintains relationships with analytical teams from the FCA, other federal agencies, and outside consultants to identify opportunities to improve its use of data to better understand its insurance risk.

See additional risk management information on page 25.

THE FARM CREDIT SYSTEM

Structure and Funding

The Farm Credit System is a network of federally chartered, cooperative lending institutions owned by the agricultural and rural customers it serves, including farmers, ranchers, producers and harvesters of aquatic products, agricultural cooperatives, and farm-related businesses. As of December 31, 2025, the System had 4 banks and 55 associations. Each association has its own chartered territory and is affiliated with one of the four banks. See Table 2 for the combined financial statistics for the banks and associations.

Table 2

Combined Farm Credit System Statistics

(Dollars in Billions)

| | 2025 | 2024 | 2023 |
|---|----------|----------|----------|
| Insured debt outstanding ¹ | \$ 482.7 | \$ 450.9 | \$ 418.4 |

Source: Federal Farm Credit Banks Funding Corporation

1. Insured debt outstanding is based on System institution call report information and reflects the book value of insured debt outstanding plus accrued interest as of December 31, 2025, 2024, and 2023. (Book value excludes fair-value adjustments.)

Associations receive funding from their affiliated bank and lend directly to their owner-borrowers, providing a consistent and reliable source of agricultural and rural credit throughout the United States, including the Commonwealth of Puerto Rico. One of the System banks (CoBank) also has nationwide authority to make retail loans to cooperatives and other eligible entities.

The banks obtain funds for their operations primarily through the sale of consolidated Systemwide debt securities. The banks own and use the Federal Farm Credit Banks Funding Corporation (Funding Corporation) to issue Systemwide debt securities in the capital markets. As the fiscal agent for the banks, the Funding Corporation partners with a select group of dealers to market and distribute the securities to investors throughout the world.

Systemwide debt securities are the general unsecured joint and several obligations of the banks. Systemwide debt securities are not obligations of, and are not guaranteed by, the U.S. government. In addition, Systemwide debt securities are not the direct obligations of the System associations and, as a result, the capital of the associations may not be available to support principal and interest payments on Systemwide debt securities.

Investor Protection

Investors provide the funds that the System lends to agriculture and rural America. FCSIC's primary purpose, as defined by the Farm Credit Act, is to insure the timely payment of principal and interest on Systemwide debt securities purchased by these investors.

Regulatory Oversight

The Farm Credit Administration is responsible for the examination, supervision, and regulation of each System institution. FCA is an agency in the executive branch of the U.S. government and derives its authorities from the Farm Credit Act. These authorities include examination and enforcement authorities similar to those of commercial bank regulators. The U.S. Senate Committee on Agriculture, Nutrition, and Forestry and the U.S. House of Representatives Committee on Agriculture oversee FCSIC, FCA, and the System.

Insured Obligations

FCSIC insures Systemwide and consolidated bonds, notes, and other obligations issued by System banks through the Funding Corporation under section 4.2(c) or (d) of the Farm Credit Act. Figure 1 shows that insured debt outstanding increased by 7.1% in 2025 to \$482.7 billion, compared with an increase of 7.8% in 2024.

Figure 1
**Insured Debt Outstanding:
Growth Averaged 8.4% Over the Past Five Years**
(Dollars in Billions)

Note: Insured debt outstanding, which is based on the call report information provided by System institutions, reflects the book value of insured debt outstanding, plus accrued interest. (Book value excludes fair-value adjustments.)

Loss Protection Layers for System Investors

The primary source of funds to repay insured Systemwide debt securities is the System's borrowers. Each borrower must demonstrate repayment capacity and, in most cases, collateral posted to secure the loan. The borrower makes payments on the loan to the lending association (or to the bank if the borrower received the loan directly from the bank), and the association in turn makes payments on its loan to its affiliated bank. The banks ultimately repay Systemwide debt securities. FCSIC maintains the Insurance Fund to insure the banks' repayment of Systemwide debt securities.

All System banks and associations currently exceed their minimum regulatory capital requirements as protection and support for the repayment of the outstanding insured debt. If a bank were unable to repay its portion of an insured Systemwide debt obligation, FCSIC would use the Insurance Fund to make the payment on its behalf. If the assets in the Insurance Fund were exhausted, the Farm Credit Act’s provisions for joint and several liability would be triggered, requiring the other System banks to repay the defaulting bank’s portion of the debt.

As Figure 2 shows, the amount of System bank capital and the balance in the Insurance Fund increased 26.8%, from \$29.2 billion at year-end 2021 to \$37.0 billion at year-end 2025.

The Insurance Fund is an asset of the United States government and does not constitute “capital” owned or controlled by the Farm Credit System. It is included in this discussion to illustrate the layers of protection for Systemwide bondholders.

Bank capital plus the amount in the Insurance Fund as a percentage of insured debt outstanding was 7.7% as of year-end 2025, up from 7.4% as of year-end 2024 (see Figure 3). The increase was due to an increase in bank capital, primarily the result of a decrease in accumulated other comprehensive loss caused by a decline in interest rates. Bank capital as a percentage of insured debt was 5.7% at year-end 2024 and 5.9% at year-end 2025.

Figure 2
Bank Capital and Insurance Fund
 (Dollars in Billions)

Source: Federal Farm Credit Banks Funding Corporation

Figure 3
Bank Capital Plus Insurance Fund as Percentage of Insured Debt

Source: Federal Farm Credit Banks Funding Corporation

Overall, the financial condition and performance of the System on a consolidated basis remains strong, although some institutions continue to experience stress from credit deterioration in certain agricultural sectors. (See trends in the Financial Institution Rating System (FIRS) in the “Risk Management” section.)

A bank’s credit exposure to borrowing associations is partially mitigated by the associations’ capital levels. As associations retain more of their net income and build capital, the bank’s credit risk declines.

As Figure 4 shows, from 2021 to 2025, combined association capital increased \$11.5 billion — an annual average increase of approximately 5.5%. The associations continue to collectively achieve solid earnings and preserve capital. Since 2021, association capital as a percentage of total association assets has declined because association asset growth has outpaced association capital growth. However, all associations were well capitalized at the end of 2025, with association capital as a percentage of total association assets equaling 16.6% (see Figure 5).

Farm Credit System Risk Management Tools

Farm Credit System banks use risk management tools to protect investors. One tool is the Contractual Interbank Performance Agreement (CIPA). All System banks have entered into this agreement, which measures the financial condition and performance of each bank by using ratios that consider bank capital, asset quality, earnings, interest rate risk, and liquidity. The CIPA contains triggers that financially penalize banks that do not meet performance standards.

The System banks and the Funding Corporation have also entered into a Market Access Agreement. The Market Access Agreement establishes conditions for each bank's continued participation in the debt market. If a bank fails to meet agreed-upon performance measures, it may be restricted from issuing debt. The performance criteria used under the Market Access Agreement are the CIPA scores and the bank's tier 1 leverage and total capital ratios.

The Farm Credit Administration's liquidity regulation requires the banks to effectively manage liquidity risk and maintain a three-tiered liquidity reserve to better withstand a liquidity crisis. Each System bank is authorized to hold eligible investments in an amount not to exceed 35% of its total outstanding loans for the purposes of maintaining a liquidity reserve, managing short-term surplus funds, and managing interest rate risk.

The liquidity reserve must always consist of readily marketable instruments that are sufficient to fund at least 90 days of the principal portion of on-balance-sheet maturing obligations. The liquidity reserve must consist of the following:

- Level 1 instruments to cover the principal portion of each bank's on-balance-sheet maturing obligations for the first 15 days
- Level 1 and 2 instruments sufficient to cover days 16 to 30
- Level 1, 2, and 3 instruments to cover days 31 to 90

Level 1 instruments include cash, overnight money market investments, obligations of U.S. government agencies with a final remaining maturity of 3 years or less, non-System government-sponsored enterprise (GSE) senior debt securities that mature within 60 days, and diversified investment funds composed exclusively of level 1 instruments.

Level 2 instruments include obligations of U.S. government agencies with a final remaining maturity of more than 3 years, mortgage-backed securities that are fully guaranteed by a U.S. government agency as to the timely repayment of principal and interest, and diversified investment funds composed exclusively of level 1 and 2 instruments.

Level 3 instruments include non-System GSE senior debt securities with maturities exceeding 60 days, mortgage-backed securities that are fully guaranteed by a GSE as to the timely repayment of principal and interest, money market instruments maturing within 90 days, and diversified investment funds composed exclusively of level 1, 2, and 3 instruments.

All four System banks exceeded these requirements in 2025.

INSURANCE FUND MANAGEMENT

The Insurance Fund and the Secure Base Amount

The Farm Credit Insurance Fund is FCSIC's equity; it is the difference between total assets and total liabilities, including insurance obligations. The Insurance Fund is composed of an unallocated Insurance Fund (the portion of the Insurance Fund for which no specific use has been designated) and an allocated Insurance Fund (the portion of the Insurance Fund that has been transferred to the allocated insurance reserves accounts (AIRAs)).

The Farm Credit Act established the secure base amount (SBA) as 2% of the aggregate outstanding insured obligations, adjusted to exclude 90% of federal government-guaranteed loans and investments and 80% of state government-guaranteed loans and investments. Because of these adjustments (deductions), the SBA was approximately 1.73% of total insured debt for 2025. Table 3 shows how the secure base amount is calculated. The Farm Credit Act also gives FCSIC sole discretion to choose another SBA percentage that it determines to be actuarially sound to maintain the Insurance Fund, considering the risk of insuring outstanding debt obligations. FCSIC has maintained the SBA at the statutory 2% level since the inception of the Insurance Fund and is committed to doing so unless it determines that 2% is no longer actuarially sound. FCSIC employs an actuarially sound model and processes to evaluate the size of the Insurance Fund and continues to conclude that 2% remains actuarially sound.

FCSIC's premiums are set with the goal of reaching and maintaining the 2% secure base amount. However, if growth of insured debt is greater than forecast when premium accrual rates are established (or the Fund is used for an authorized purpose), the Insurance Fund will end the year below the secure base amount, and FCSIC will need to collect additional premiums in the following year to make up the shortfall. If growth of insured debt is less than forecast when premium accrual rates are set, then the Insurance Fund may end the year above the secure base amount.

If the Insurance Fund exceeds the secure base amount at the end of any calendar year, FCSIC allocates the excess amounts, minus budgeted annual operating expenses and insurance obligations, to the AIRAs established by Congress for the benefit of the System banks. Once FCSIC determines that the allocation is appropriate and that the funds in the AIRAs are not otherwise needed, FCSIC may pay the amounts in the AIRAs to the account holders (the System banks) in accordance with the formula specified in the Farm Credit Act.

Table 3
Calculation of Secure Base Amount
(Dollars in Millions)

| | 12/31/2025 | 12/31/2024 |
|--|-----------------|-----------------|
| Total principal and interest of debt outstanding | \$ 482,716 | \$ 450,921 |
| Less: | | |
| 90% federal government–guaranteed loans | (8,263) | (8,336) |
| 80% state government–guaranteed loans | (35) | (26) |
| 90% federal government–guaranteed investments | (56,669) | (48,722) |
| 80% state government–guaranteed investments | 0 | 0 |
| Total deduction | (64,967) | (57,084) |
| Adjusted insured debt | 417,750 | 393,837 |
| Secure base amount (2%) | 8,355 | 7,877 |
| Unallocated and allocated Insurance Fund balance | 8,585 | 7,959 |
| Unallocated and Allocated Insurance Fund as a % of Adjusted Insured Debt | 2.05% | 2.02% |

Both total Insurance Fund and total assets increased by 7.9% to \$8.6 billion in 2025 (see Figure 6). Insured debt outstanding grew \$31.8 billion in 2025 (7.1%).

The unallocated and allocated Insurance Fund as a percentage of adjusted insured debt at December 31, 2025, was 2.05%, which was \$230 million above the secure base amount (see Figure 7). When the aggregate amount in the Insurance Fund exceeds the SBA at the end of the calendar year, FCSIC is required to allocate the excess amount to the AIRAs, less the amount that FCSIC, in its sole discretion, determines to be the sum of the estimated operating expenses and estimated insurance obligations for the next calendar year. Since there are no insurance obligations and FCSIC’s budget for 2026 is \$5.6 million, FCSIC transferred \$224 million to the AIRAs on December 31, 2025.

FCSIC also transferred funds to the AIRAs in 2024. The unallocated and allocated Insurance Fund as a percentage of adjusted insured debt at December 31, 2024, was 2.02%, \$82 million above the SBA (see Figure 7). Since there were no insurance obligations and the 2025 budget was \$5.3 million, in 2024, FCSIC transferred \$77 million to the AIRAs.

Figure 6
Insurance Fund Balances
(Dollars in Billions)

Figure 7
Insurance Fund Relative to 2% Secure Base Amount

Premiums

In setting premiums, the FCSIC board's objective is to achieve and maintain the statutory secure base amount of 2% in the Insurance Fund. The board reviews premium assessment rates as often as necessary but at least semiannually. The review focuses on the current level of the Insurance Fund and the amount of money and time needed to reach the secure base amount based on expected growth in Systemwide insured obligations.

The review also examines the risk that the Insurance Fund will need to be used in the next 12 months. It includes an analysis of the condition of the System, the health of the agricultural economy, and risks in the financial environment.

The Farm Credit Act requires premium assessments to be 20 basis points on adjusted insured debt outstanding unless they are reduced by the FCSIC board of directors. There is a risk surcharge of up to 10 basis points on nonaccrual loans and on other-than-temporarily impaired investments. In addition, the Farm Credit Act reduces the total insured debt on which premiums are assessed and requires premiums to be based on outstanding insured debt obligations adjusted downward by 90% of federal government-guaranteed loans and investments and by 80% of state government-guaranteed loans and investments.

The unallocated Insurance Fund began 2025 at 2.0% of the secure base amount. The board of directors set premium accrual rates on February 11, 2025, at 10 basis points on average adjusted insured debt and an assessment of a 10 basis points surcharge on the average principal balance outstanding for nonaccrual loans and other-than-temporarily impaired investments.

At its July 9, 2025, meeting, the board of directors reviewed premiums and voted to maintain the premium accrual rate on average adjusted insured debt at 10 basis points. The board also continued the assessment of the surcharge of 10 basis points on the average principal balance outstanding for nonaccrual loans and other-than-temporarily impaired investments for the second half of 2025. The most important determinants in setting premium accrual rates are the Insurance Fund balance and prospects for Systemwide debt growth during the year.

During 2025, insured debt outstanding increased by 7.1%. The Insurance Fund finished 2025 above the 2% secure base level, at 2.05% of adjusted insured obligations or \$230 million above the target level.

Revenues and Expenses

FCSIC operates with no annually appropriated funds. It collects insurance premiums from each Farm Credit System bank. These premiums and the income from its investment portfolio provide the funds necessary to fulfill its mission.

FCSIC's revenues increased to \$707.3 million in 2025 from \$628.8 million in 2024 (see Figure 8). Interest income increased to \$303.4 million in 2025 from \$252.8 million in 2024.

Figure 8
FCSIC Revenues
 (Dollars in Millions)

FCSIC operates with a small core staff and use private- and public-sector contractors to leverage its efforts. The board of directors and management adopted this model as a cost-effective and efficient way to use available expertise, services, and resources to accomplish its mission.

FCSIC's operating costs as a percentage of total assets represented 6 basis points for 2025, unchanged from 2024. Costs for staff salaries, rent, and miscellaneous expenses were \$3.8 million of the \$4.8 million total for the year. The remaining expenses of \$1.0 million were for contracted services. Total expenses were up slightly compared with the prior year (see Figure 9).

Figure 9
FCSIC Operating Expenses
(Dollars in Millions)

INVESTMENTS

FCSIC's investments increased from \$7.5 billion as of year-end 2024 to \$8.1 billion as of year-end 2025 (see Figure 10) due to the premiums collected from System banks and earnings on investments. FCSIC invested \$376.0 million received from System banks for 2024 premiums (received in January 2025) and \$235.0 million in interest received during the year. These amounts were offset by AIRA distributions of \$76.6 million in March 2025. At December 31, 2025, FCSIC held \$1.6 million in the overnight investment account, compared with \$24.2 million at December 31, 2024. The funds in the overnight investment account are classified as "cash and cash equivalents" on the balance sheet.

FCSIC's primary investment objective is to ensure adequate liquidity of the Insurance Fund to meet its mission. FCSIC's secondary objective is to optimize the rate of return on its investment portfolio. Funds are invested in U.S. Treasury securities in accordance with the Farm Credit Act and FCSIC's investment policy. All investments are held to maturity. FCSIC does not trade for capital gains purposes.

In 2025, the board of directors revised its Policy Statement on Investments, reaffirming a short-duration investment strategy to minimize loss exposure in the event FCSIC needs to make disbursements to meet its statutory obligations. Under the current policy, at least 35% of the portfolio must consist of Treasury securities with remaining maturities of 2 years or less; Treasury securities with maturities of between 5 and 10 years must not exceed 20% of the portfolio. FCSIC does not purchase Treasury securities with maturities that exceed 10 years.

In 2023, FCSIC fully implemented its five-year bond ladder strategy. In 2025, FCSIC had about 41% of the portfolio in the 0- to 2-year range and about 59% of the portfolio in the 3- to 5-year range. As of December 31, 2025, the weighted-average maturity of the portfolio was 2.55 years, slightly higher from its level at the end of 2024. The composition of the investment portfolio as of December 31, 2025, is shown in Figure 11.

In 2023, FCSIC adopted a new 60-month benchmark to assess portfolio performance. The benchmark is designed to compare FCSIC's performance against a passive five-year bond ladder investment strategy. In 2025, the average FCSIC investment portfolio yield was 3.8%, up from 3.4% in 2024. FCSIC's benchmark yield equaled 2.9% in 2025, up from 2.3% in 2024.

Figure 10
FCSIC Investments
 (Dollars in Billions)

Note: Total investments reflected on this chart include overnight investments classified as “cash and cash equivalents” on the balance sheet.

Figure 11
Investment Portfolio by Maturity as of December 31, 2025
 (Dollars in Millions)

Note: Total investments reflected in this chart include overnight investments classified as “cash and cash equivalents” on the balance sheet.

At least 35% of the portfolio must consist of Treasury securities with remaining maturities of 2 years or less; Treasury securities with maturities of between 5 and 10 years must not exceed 20% of the portfolio.

RISK MANAGEMENT

FCSIC's primary purpose is to insure the timely payment of principal and interest on Systemwide debt securities. The System banks, through the jointly owned Federal Farm Credit Banks Funding Corporation, issue Systemwide debt securities, insured by FCSIC, to fulfill their mission. Anything impairing the System banks' ability to repay their insured debt constitutes an insurance risk. To carry out its mission, FCSIC monitors conditions in the farm, rural, domestic, and global economies that affect the System's ability to repay insured debt obligations.

FCSIC works productively with FCA, the System's primary safety and soundness regulator, to mitigate risk to the Insurance Fund. It partners with FCA examination staff to explore institution specific risk issues, participates in joint FCA-FCSIC working groups, and consults with FCA on proposed mergers, capital actions, and other System applications. When it identifies key systemic and structural risks to the Insurance Fund, it seeks to manage those risks, in part, by working with FCA to develop mitigating regulatory, policy, and supervisory solutions.

FCSIC's Risk Profile

FCSIC's Insurance Fund is exposed to a variety of risks, some inherent in insuring financial institutions and others specific to the System. Examples of specific events that could increase risk to the Insurance Fund include the following:

- Material reduction in System bank capital
- Material adverse change in the System banks' ability to access debt markets
- Catastrophic operational failure at a System institution related to a control deficiency or cybersecurity breach
- Inadequate governance at a System institution, such as a failed business strategy or mismanagement of the organization
- Significant, rapid, or unexpected credit deterioration resulting from adversity in the agricultural sector

Major categories of risk monitored by FCSIC include the following:

Credit risk — the risk of default on a debt that may arise from a borrower failing to make required payments. Credit risk includes consideration of loan concentrations and other broad elements of System institution portfolios. FCSIC primarily focuses on credit risk issues affecting the underlying agricultural borrowers' ability to repay their debts to individual System institutions. These risks include the following:

- Changes in farmland values
- Price volatility for agricultural commodities
- Changes in government support programs for agricultural producers
- Changes in supply and demand for U.S. agricultural products
- Changes in international trade and the value of the U.S. dollar
- Changes in production costs

- Changes in the domestic economy that affect incomes from off-farm jobs
- Climate, weather, and other environmental conditions
- Availability of agricultural workers

Liquidity risk — the risk that an institution may be unable to meet short-term financial demands without unacceptable losses. The System relies on its ability to regularly issue new debt obligations in part to pay maturing obligations. The System banks also hold liquidity investments that are available if needed. A significant disruption in the System banks' ability to issue new debt obligations or sell liquidity investments would impair their ability to repay insured obligations. As further discussed on page 32, FCSIC has procedures in place to provide liquidity assistance to System banks if external market circumstances make it likely that the banks will be unable to pay maturing insured obligations.

Interest rate risk — the risk that changes in interest rates may reduce the value of assets with a consequent negative impact on operating results and financial condition.

Operational risk — the prospect of losses resulting from inadequate or failed procedures, controls, systems, or policies, including employee errors, systems failures, or fraud or other unauthorized activity. Operational risk also includes inadequate defenses against cyber-threats.

Strategic risk — the risk that a failed business strategy, decision, or series of decisions leads to losses.

Structural risk — the risk related to the design of the Farm Credit System. For example, as a lender to a single industry (agriculture), the System has a built-in concentration risk. Also, any changes to the System's fundamental organization, such as an alteration in the supervisory relationship between System banks and associations, or diminution of the two layers of loss-absorbing capital, may create risk to the Insurance Fund.

Reputational risk — the risk resulting from events that affect the reputation of the System or the agriculture industry. Such events may affect the System's funding costs depending on market reaction.

Political risk — the risk of loss of support from federal and state governments. This includes any change in government support for government-sponsored enterprises.

The Risk Environment in 2025

The global economy remained resilient in 2025. Growth was supported by easing financial conditions and sustained public and private investment, particularly in digitalization and advanced technologies. Labor markets remained broadly strong, with unemployment relatively low in many economies and job creation supporting household incomes and consumption. Inflation generally eased across much of the world, giving central banks more room to lower interest rates. Overall, economic growth was steady though relatively modest compared to long-term trends.

The U.S. economy also remained resilient in 2025, though growth slowed toward the end of the year following a prolonged government shutdown. U.S. real gross domestic product increased 2.2%, down from 2.8% in 2024. Consumer spending remained steady and was the key driver of growth throughout the year, even as job gains slowed and wage growth moderated. Personal consumption expenditures increased by 2.7%, with goods and services consumption increasing by 3.2% and 2.4%, respectively. Gross private domestic investment was mixed; the overall increase was 2.0%. Investment in equipment and intellectual property products remained strong at 8.2% and 5.8%, respectively, while investment in nonresidential structures and residential construction declined 5.0% and 2.2%, respectively. The trade deficit continued to widen as imports exceeded exports.

Inflation slowed in 2025 but remained elevated. The year-over-year increase in the seasonally adjusted consumer price index dropped from 2.9% in 2024 to 2.7% in 2025. In response, the Federal Reserve lowered the federal funds rate 75 basis points between September and December, ending the year with a target rate of 3.50–3.75%. Longer-term Treasury yields dropped modestly over the course of the year.

Despite weak job growth and a notable decline in job openings, the U.S. labor market remained generally healthy. The unemployment rate rose from 4.1% at the end of 2024 to 4.4% at the end of 2025. Meanwhile, the annual increase in average hourly wages slowed, and the ratio of job openings to unemployed workers declined, though it remained above its historical average.

The agricultural sector remains a key economic force in the U.S. economy and is strongly affected by domestic and global economic conditions, government policies and changing weather patterns. Global and domestic adverse weather events, food safety, disease, pandemics, geopolitical events, and other unfavorable conditions also directly affect the agricultural sector.

A key factor affecting U.S. agriculture in 2025 was uncertainty about China's purchase of U.S. soybeans. After remaining absent from the U.S. soybean market for much of 2025, China committed to purchase 12 million metric tons of U.S. soybeans for the last two months of 2025 and at least 25 million metric tons in 2026, 2027, and 2028. Another key factor is that the growth in Brazilian soybean production over the last several years has contributed to lower soybean prices and weakened profitability projections for U.S. soybean producers.

Also impacting U.S. agricultural trade are global agricultural commodity supplies and demand, changes in the value of global currencies relative to the U.S. dollar, and domestic government support for agriculture.

In February 2026, the USDA forecast net farm income (income after expenses from production) for 2025 at \$154.5 billion,¹ a \$27.0 billion increase from 2024 and \$45.9 billion above the 10-year average. The forecasted increase in net farm income from 2024 is primarily due to increases in cash receipts for animals and animal products of \$22.3 billion and direct

¹ U.S. Department of Agriculture, Economic Research Service. (2026, February 5). Farm Sector Income & Finances: Farm Sector Income Forecast.

government payments of \$20.5 billion, partially offset by an increase in cash expenses of \$19.6 billion and a decrease in cash receipts for crops of \$6.9 billion.

The USDA's forecast projects net farm income for 2026 at \$153.4 billion,² a \$1.1 billion or 0.7% decrease from 2025 and \$44.8 billion above the 10- year average in nominal dollars. In inflation-adjusted 2026 dollars, net farm income is forecast to decline by \$4.1 billion (2.6 percent) from 2025 to 2026. The forecasted decrease in net farm income for 2026 is primarily due to an expected decrease in cash receipts for animals and animal products of \$17.0 billion which is partially offset by an expected \$13.8 billion increase in direct government farm payments.

The decrease in animals and animal products reflects anticipated falling receipts for eggs and milk due to lower prices, while beef cattle receipts are expected to continue growing in 2026. The overall increase in direct government payments reflects higher anticipated payments from Farm Bill programs that trigger payments when commodity prices fall, while supplemental and ad hoc disaster assistance payments are expected to remain high.

The USDA expects some deterioration of the farm sector balance sheet will occur in 2026. Farm sector working capital is projected to decrease \$14.3 billion or 9.2%, while solvency ratios weaken for the third consecutive year. The farm sector debt-to-assets ratio is projected to increase slightly from 13.5% in 2025 to 13.7% in 2026, still below its peak.

The System's loan volume increased \$28.0 billion, or 6.5%, to \$456.9 billion at year-end 2025, compared with \$428.9 billion at year-end 2024. The growth was primarily due to increases in the following loan categories: real estate mortgages, production and intermediate-term loans, agribusiness, and power loans.

System credit quality deteriorated but remained relatively sound in 2025. Nonaccrual loans increased \$1.1 billion, or 36.0%, to \$4.3 billion at December 31, 2025. The increase was primarily due to credit quality deterioration, which affected a limited number of borrowers in the food and beverage processing, tree fruits and nuts, communication, grapes and wine, and distilled beverages sectors. The ratio of nonaccrual loans to total loans outstanding was 0.94% at December 31, 2025, and 0.74% at December 31, 2024 (see Figure 12).

² Ibid.

Figure 12

Nonaccrual Loans as a Percentage of Total Loans Outstanding

Source: Federal Farm Credit Banks Funding Corporation

The System’s allowance for credit losses on loans was \$2.2 billion at December 31, 2025, an increase of \$410 million, or 22.8%, versus December 31, 2024. The allowance for loan losses represents the aggregate of each System entity’s individual evaluation of its allowance for loan losses requirements. Evaluations consider factors including loan loss experience, portfolio quality and composition, collateral value, current agricultural production, and economic conditions. Although aggregated for the System’s combined financial statements, the allowance of each entity is specific to that institution and is not available to absorb losses at other System entities.

The System continued to have reliable access to the debt markets to support its mission. Investor demand for Systemwide insured debt securities remained favorable across all products throughout 2025. The System is a government-sponsored enterprise that continues to benefit from broad access to domestic and global capital markets, providing a dependable source of competitively priced debt.

FCA’s capital rule for banks and associations is comparable to the Basel III standardized approach adopted by the federal banking regulatory agencies. FCA’s regulatory minimums include a 4.5% common equity tier 1 risk-based capital ratio, a 6.0% tier 1 risk-based capital ratio, an 8.0% total risk-based capital ratio, and a 4.0% tier 1 leverage ratio, of which at least 1.5% must be composed of unallocated retained earnings (URE) and URE equivalents. The risk-

based capital ratios also include a 2.5% common equity tier 1 capital conservation buffer. The tier 1 leverage ratio includes a 1.0% leverage buffer. As of December 31, 2025, all System institutions exceeded the regulatory minimum and buffer requirements.

FCA authorizes each System bank to hold eligible investments in an amount not to exceed 35% of its total outstanding loans for the purposes of maintaining a liquidity reserve, managing short-term funds, and managing interest rate risk. The liquidity reserve must consist of marketable investments that are sufficient to fund 90 days of on-balance-sheet maturing obligations. The System banks reported a combined \$107.5 billion in cash and available-for-sale investments with a liquidity position of 167 days at year-end 2025, down from 177 days at year-end 2024.

The System banks are further required to maintain a three-tiered liquidity reserve, consisting of level 1 instruments to cover each bank's maturing obligations for the first 15 days; level 1 and 2 instruments sufficient to cover days 16 to 30; and level 1, 2, and 3 instruments to cover days 31 to 90. All four System banks exceeded these requirements in 2025.

The System banks have established contingency funding plans to provide for events that could impede access to the debt markets. The System banks also regularly perform credit and liquidity stress testing to determine their ability to withstand severe market events while continuing to fulfill their mission.

Figure 13 shows a summary of composite year-end Financial Institution Rating System (FIRS) ratings for System banks and associations. Institutions with performance-related issues continued to receive greater examination scrutiny and supervisory attention from FCA.

Figure 13
FIRS Composite Year-End Ratings for Banks and Associations of the Farm Credit System

FINANCIAL ASSISTANCE AND RESOLUTIONS

FCSIC has statutory authority to provide “stand-alone assistance” to a System bank or association for any of the following reasons:

- To prevent the placing of the institution in receivership
- To restore the institution to “normal operations”
- To reduce the risk to FCSIC caused by “severe financial conditions”

FCSIC may also provide assistance to facilitate a merger or consolidation of a troubled System institution with another System institution.

At present, no assistance agreements are outstanding. If a System institution needs financial assistance, FCSIC must ensure that the proposed assistance is the least costly means for resolving the institution’s problems; by law, FCSIC cannot provide financial assistance if the cost of liquidation is lower than the cost of providing assistance.

FCSIC has procedures in place to provide liquidity assistance to System banks when severe financial conditions threaten the banks’ ability to repay maturing insured debt. The procedures implement FCSIC’s Policy Statement Concerning Assistance. Along with the procedures, FCSIC developed a model assistance agreement, drafted necessary forms related to valuation of collateral and liquidity reserves, and entered into a collateral pledge agreement with each bank and a collateral custodian. FCSIC reviews the procedures annually to evaluate whether changes are needed and to engage with System stakeholders through a biennial preparedness exercise. FCSIC liquidity assistance is designed to cover System bank insured debt obligations during a short-term liquidity crisis, allowing markets time to recover normal operation.

To support potential liquidity assistance needs, FCSIC maintains a \$10 billion line of credit with the Federal Financing Bank that can be accessed when exigent market circumstances make it extremely doubtful that the System banks will be able to pay maturing debt obligations that FCSIC insures. This liquidity backstop allows FCSIC to provide more assistance to System banks than it otherwise could provide from the Insurance Fund alone.

When appointed by FCA, FCSIC has the statutory responsibility to serve as receiver or conservator for System banks and associations. As conservator, FCSIC will operate the institution as a going concern. Upon appointment as receiver, FCSIC will take possession of a System institution to settle its business operations, collect the debts owed to it, liquidate its property and assets, pay its creditors, and distribute any remaining proceeds to stockholders. FCSIC's statutory receivership and conservatorship powers are based on, and intended by Congress to be functionally equivalent to, those of the FDIC.

Currently there are no active receiverships or conservatorships in the System.

FCSIC's staff maintains contact with the resolution staff of the FDIC and the National Credit Union Administration (NCUA) to stay informed about best practices and exchange information concerning receivership management.

FCSIC has board-approved policies that provide guidance related to resolution activities, including the provision of financial assistance to System banks and associations, the management and disposition of owned assets, and FCSIC's examination authority for troubled institutions. These policies are supported by detailed procedures. The FCSIC board must review and approve all policy statements every five years.

INDEPENDENT AUDITORS' REPORT

Board of Directors
Farm Credit System Insurance Corporation
McLean, VA 22102

In our audits of the fiscal years 2025 and 2024 financial statements of the Farm Credit System Insurance Corporation (FCSIC), we found:

- FCSIC's financial statements as of and for the fiscal years ended December 31, 2025 and 2024, are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America;
- FCSIC maintained, in all material respects, effective internal control over financial reporting as of December 31, 2025; and
- No reportable noncompliance for fiscal year 2025 with provisions of applicable laws, regulations, contracts, and grant agreements that we tested.

The following sections contain:

1. Our report on FCSIC's financial statements and on internal control over financial reporting, including: an other-matter paragraph related to hyperlinked data within the Annual Report; a section on other information¹ included with the financial statements; and
2. Other reporting required by *Government Auditing Standards*, which is our report on FCSIC's compliance and other matters. This section also includes FCSIC's comments on our report.

REPORT ON THE AUDITS OF THE FINANCIAL STATEMENTS AND ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Opinion on the Financial Statements

We have audited the financial statements of FCSIC, which comprise the statements of financial condition as of December 31, 2025 and 2024; the related statements of income and expenses and changes in insurance fund and statements of cash flows for the fiscal years then ended; and the related notes to the financial statements (collectively, the financial statements).

In our opinion, the accompanying financial statements present fairly, in all material respects, FCSIC's financial position as of December 31, 2025 and 2024, and the results of its operations and its cash flows for the fiscal years then ended, in accordance with accounting principles generally accepted in the United States of America.

¹ Other information consists of information included with the financial statements, other than the auditors' report.

Opinion on Internal Control over Financial Reporting

We also have audited FCSIC's internal control over financial reporting as of December 31, 2025, based on criteria established under 31 U.S.C. § 3512(c), (d), commonly known as the Federal Managers' Financial Integrity Act of 1982 (FMFIA). In our opinion, FCSIC maintained, in all material respects, effective internal control over financial reporting as of December 31, 2025, based on criteria established under FMFIA.

Basis for Opinions

We conducted our audits in accordance with U.S. generally accepted auditing standards (GAAS); standards applicable to financial statement audits contained in Generally Accepted Government Auditing Standards (GAGAS), issued by the Comptroller General of the United States; and guidance contained in Office of Management and Budget (OMB) Bulletin 24-02, *Audit Requirements for Federal Financial Statements*. Our responsibilities under those standards and OMB Bulletin 24-02 are further described in the *Auditors' Responsibilities for the Audit of the Financial Statements and Internal Control over Financial Reporting* subsection of our report. We are required to be independent of FCSIC and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Other Matter

Management has elected to include hyperlinks to information on websites outside the Annual Report to provide additional information for the users of its financial statements. Such information is not a required part of the financial statements or supplementary information required by the Financial Accounting Standards Board (FASB). The information on these websites has not been subjected to auditing procedures, and accordingly, we do not express an opinion or provide any assurance on it.

Responsibilities of Management for the Financial Statements and Internal Control over Financial Reporting

Management is responsible for (1) the preparation and fair presentation of the financial statements in accordance with U.S. generally accepted accounting principles; (2) the preparation and presentation of other information included in FCSIC's Annual Report, and ensuring the consistency of that information with the audited financial statements; (3) the design, implementation, and maintenance of effective internal control over financial reporting relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; (4) its assessment of the effectiveness of internal control over financial reporting based on the criteria established under FMFIA; and (5) its assessment of the effectiveness of internal control over financial reporting as of December 31, 2025, included in the accompanying Management's Report on Internal Control over Financial Reporting.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about FCSIC's ability to continue as a going concern for a reasonable period of time.

Auditors' Responsibilities for the Audits of the Financial Statements and Internal Control over Financial Reporting

Our objectives are to (1) obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and whether effective internal control over financial reporting was maintained in all material respects, and (2) issue an auditors' report that includes our opinions.

Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit of the financial statements or an audit of internal control over

financial reporting conducted in accordance with GAAS, GAGAS, and OMB guidance will always detect a material misstatement or a material weakness when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements, including omissions, are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgments made by a reasonable user based on the financial statements.

In performing an audit of financial statements and an audit of internal control over financial reporting in accordance with GAAS, GAGAS, and OMB guidance, we:

- Exercise professional judgment and maintain professional skepticism throughout the audits.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit of the financial statements in order to design audit procedures that are appropriate in the circumstances.
- Obtain an understanding of internal control relevant to our audit of internal control over financial reporting, assess the risks that a material weakness exists, and test and evaluate the design and operating effectiveness of internal control over financial reporting based on the assessed risk. Our audit of internal control also considered FCSIC's process for evaluating and reporting on internal control over financial reporting based on criteria established under FMFIA. We did not evaluate all internal controls relevant to operating objectives as broadly established under FMFIA, such as those controls relevant to preparing performance information and ensuring efficient operations. We limited our internal control testing to testing controls over financial reporting. Our internal control testing was for the purpose of expressing an opinion on whether effective internal control over financial reporting was maintained, in all material respects. Consequently, our audit may not identify all deficiencies in internal control over financial reporting that are less severe than a material weakness.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Perform other procedures we consider necessary in the circumstances.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about FCSIC's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the financial statement audit.

Definition and Inherent Limitations of Internal Control over Financial Reporting

An entity's internal control over financial reporting is a process effected by those charged with governance, management, and other personnel. The objectives of internal control over financial reporting are to provide reasonable assurance that:

- Transactions are properly recorded, processed, and summarized to permit the preparation of financial statements in accordance with U.S. generally accepted

accounting principles, and assets are safeguarded against loss from unauthorized acquisition, use, or disposition, and

- Transactions are executed in accordance with provisions of applicable laws, including those governing the use of budget authority, regulations, contracts, and grant agreements, noncompliance with which could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent, or detect and correct, misstatements due to fraud or error. We also caution that projecting any evaluation of effectiveness to future periods is subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Other Information

FCSIC's other information contains a wide range of information, some of which is not directly related to the financial statements. This information is presented for purposes of additional analysis and is not a required part of the financial statements. Management is responsible for the other information included in FCSIC's Annual Report. The other information comprises the information included in the Annual Report but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

OTHER REPORTING REQUIRED BY GOVERNMENT AUDITING STANDARDS

REPORT ON COMPLIANCE AND OTHER MATTERS

In connection with our audits of FCSIC's financial statements, we tested compliance with selected provisions of applicable laws, regulations, contracts, and grant agreements consistent with our auditors' responsibilities discussed below.

Results of Our Tests for Compliance with Laws, Regulations, Contracts, and Grant Agreements and Other Matters

Our tests for compliance with selected provisions of applicable laws, regulations, contracts, and grant agreements disclosed no instances of noncompliance or other matters for fiscal year 2025 that would be reportable under GAGAS. However, the objective of our tests was not to provide an opinion on compliance with laws, regulations, contracts, and grant agreements applicable to FCSIC. Accordingly, we do not express such an opinion.

Basis for Results of Our Tests for Compliance with Laws, Regulations, Contracts, and Grant Agreements and Other Matters

We performed our tests of compliance in accordance with GAGAS and OMB audit guidance.

Responsibilities of Management for Compliance with Laws, Regulations, Contracts, and Grant Agreements

FCSIC management is responsible for complying with laws, regulations, contracts, and grant agreements applicable to FCSIC.

Auditors' Responsibilities for Tests of Compliance with Laws, Regulations, Contracts, and Grant Agreements

Our responsibility is to test compliance with selected provisions of laws, regulations, contracts, and grant agreements applicable to FCSIC that have a direct effect on the determination of material amounts and disclosures in FCSIC's financial statements, and to perform certain other limited procedures. Accordingly, we did not test compliance with all laws, regulations, contracts, and grant agreements applicable to FCSIC. We caution that noncompliance may occur and not be detected by these tests.

Intended Purpose of Reporting on Compliance with Laws, Regulations, Contracts, and Grant Agreements and Other Matters

The purpose of this report is solely to describe the scope of our testing of compliance with selected provisions of applicable laws, regulations, contracts, and grant agreements, and the results of that testing, and not to provide an opinion on compliance. This report is an integral part of an audit performed in accordance with GAGAS in considering compliance. Accordingly, this report on compliance with laws, regulations, contracts, and grant agreements and other matters is not suitable for any other purpose.

FCSIC's COMMENTS

FCSIC's management did not provide any formal comments to this report.

Farm Credit System Insurance Corporation

Notes to the Financial Statements

Note 1: Organization and Summary of Significant Accounting Policies

Farm Credit Insurance Fund (Insurance Fund)

Statutory Framework:

The Agricultural Credit Act of 1987 established the Farm Credit System Insurance Corporation (the Corporation or FCSIC) for the purpose of insuring the timely payment of principal and interest on notes, bonds, debentures, and other obligations issued under subsection (c) or (d) of section 4.2 of the Farm Credit Act of 1971, as amended (the Farm Credit Act). Each bank in the Farm Credit System (System) participating in insured obligations is an insured System bank. At December 31, 2025 there were four insured System banks and 55 direct lender associations, unchanged from December 31, 2024.

The Corporation is managed by a board of directors consisting of the same individuals as the Farm Credit Administration (FCA) board except that the chairman of the FCA board may not serve as the chairman of the Corporation's board of directors.

The Corporation must spend amounts in the Insurance Fund necessary to insure the timely payment of interest and principal on insured obligations. The Corporation, in its sole discretion, is authorized to expend amounts to provide financial assistance to System banks and direct lender associations. The Corporation may also act as receiver or conservator of a System bank or association. In addition, FCSIC has the authority to create, and the Farm Credit Administration to charter, a System bridge bank, to assist with resolving a failed bank.

As of December 31, 2025, the System banks reported amounts totaling \$483 billion of insured obligations compared to \$451 billion as of December 31, 2024.

When the Insurance Fund is exhausted after making payments on insured obligations, remaining System banks will be required to make payments under joint and several liability, as required by section 4.4 (a)(2) of the Farm Credit Act. The insurance provided by the Insurance Fund is limited to the resources in the Insurance Fund. System obligations are not guaranteed by the U.S. government.

Under section 5.63 of the Farm Credit Act, the Corporation is exempt from all Federal, state, and local taxes with the exception of real property taxes.

Accounting Framework:

The Corporation applies accounting and reporting standards issued by the Financial Accounting Standards Board (FASB).

Note 2: Basis of Accounting

The accounting and reporting policies of the Corporation conform to accounting principles generally accepted in the United States of America (GAAP) and, as such, the financial statements have been prepared using the accrual basis of accounting.

Cash and Cash Equivalents

Cash and cash equivalents include investments in U.S. Treasury obligations with original maturities of 90 days or less. At December 31, 2025, the Corporation held \$1,613.9 thousand in overnight Treasury certificates maturing on January 2, 2026, with an interest rate of 3.56 percent, and approximately \$200.0 thousand in cash. At December 31, 2024, the Corporation held \$24,156.1 thousand in overnight

Farm Credit System Insurance Corporation

Notes to the Financial Statements

Treasury certificates maturing on January 2, 2025, with an interest rate of 4.32 percent, and approximately \$200.0 thousand in cash.

Investments in U.S. Treasury Obligations

Section 5.62 of the Farm Credit Act requires that funds of the Corporation, not otherwise employed, shall be invested in obligations of the United States or in obligations guaranteed as to principal and interest by the United States. The Corporation has classified its investments as held-to-maturity in accordance with FASB Accounting Standards Codification (ASC) 320, *Investments - Debt and Equity Securities* and carries them at amortized cost. Amortization of premium and accretion of discount on investments has been computed under the interest method since 2002.

Investments in U.S. Treasury obligations are generally not expected to have an allowance for credit losses as there is a zero-loss expectation because they are explicitly guaranteed by the U.S. Government, are highly rated by major rating agencies, and have a long history of no credit losses. At December 31, 2025 and 2024, FCSIC has estimated allowance for losses on investments to be zero.

Premium Receivable - Concentration of Credit Risk

The Farm Credit Act requires that the System banks pay premiums to FCSIC. The premium receivable balance consists of amounts due from the four System banks and as such is exposed to risks due to concentration. Historically, FCSIC has not experienced any losses related to the premium receivable balance. FCSIC performs a quarterly analysis related to estimating an allowance for premium receivable which continues to indicate that no allowance is warranted.

Leases

Leases arise from contractual obligations that convey the right to control the use of identified property, plant, or equipment for a period of time in exchange for consideration. At the inception of the contract, FCSIC determines if an arrangement contains a lease based on whether there is an identified asset and whether FCSIC controls the use of the identified asset. FCSIC also determines whether the lease classification is an operating or financing lease at the commencement date.

A right-of-use asset represents FCSIC's right to use an underlying asset and a lease liability represents FCSIC's obligation to make payments during the lease term. Right-of-use assets are recorded and recognized at commencement for the lease liability amount, adjusted for initial direct costs incurred and lease incentives received. Lease liabilities are recorded at the present value of the future lease payments over the lease term at commencement. FCSIC uses the 10-year U. S. Treasury rate at the lease commencement date for all new or extended leases to determine the present value of lease payments.

FCSIC's operating lease typically includes non-lease components such as common-area maintenance costs, utilities, and other maintenance costs. FCSIC has elected to include non-lease components with lease payments for the purpose of calculating lease right-of-use assets and liabilities.

FCSIC's lease terms may include options to extend or terminate the lease. FCSIC uses the base, non-cancelable, lease term when recognizing the lease assets and liabilities, unless it is reasonably certain that FCSIC will exercise those options. FCSIC's lease agreements do not contain any material residual value guarantees or material restrictive covenants.

FCSIC does not have any short-term, finance, or variable cost lease agreements.

Farm Credit System Insurance Corporation

Notes to the Financial Statements

Liability for Estimated Insurance Obligations

The liability for estimated insurance obligations is the present value of estimated probable insurance payments to be made in the future based on the Corporation's analysis of economic conditions of insured System banks.

The insured System banks' primary lending markets are borrowers engaged in farming, ranching, and producing or harvesting of aquatic products, and their cooperatives. Financial weaknesses in these market segments and the effect of general market conditions on the System's borrowers could adversely affect the banks' financial condition and profitability. Insured System banks also face risks from changing interest rate environments and the need to maintain ongoing access to financial markets. Adverse changes in the financial condition and profitability of insured System banks resulting from increased levels of credit, financial, or other risks could occur in the future which would require a liability for estimated insurance obligations to be recorded.

The Corporation actively monitors the creditworthiness and financial condition of the insured System banks. Management is not aware of any events or circumstances at this time which would require a liability for estimated insurance obligations to be recorded at December 31, 2025.

Premiums

Annual premiums are recorded as revenue during the 12-month calendar year period on which the premiums are based. All premiums are required to be paid to FCSIC on or before January 31st of the year subsequent to the year in which they are earned.

Use of Estimates

GAAP requires management to make estimates and assumptions in the preparation of financial statements that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Note 3: Investments in U.S. Treasury Obligations

In addition to the amounts referenced in Note 2, Cash and Cash Equivalents, at December 31, 2025 and 2024, investments in U.S. Treasury obligations, which are carried at amortized cost, consisted of the following:

| <i>(Dollars in thousands)</i> | Amortized Cost | Gross Unrealized Gains | Gross Unrealized Losses | Estimated Fair Value |
|-------------------------------|-------------------|------------------------------|-------------------------------|-------------------------|
| December 31, 2025 | | | | |
| U.S. Treasury obligations | \$ 8,140,145 | \$ 81,579 | \$ (7,208) | \$ 8,214,516 |
| December 31, 2024 | | | | |
| U.S. Treasury obligations | \$ 7,521,134 | \$ 9,873 | \$ (77,287) | \$ 7,453,720 |

The fair value of FCSIC's investments in U.S. Treasury obligations have been included below for disclosure purposes only and are estimated based on quoted market prices for those instruments. The estimated fair value of U.S. Treasury obligations is measured using the Level 1 hierarchy, which is defined in the accounting standards as unadjusted quoted prices in active markets for identical assets that are available at the measurement date.

Farm Credit System Insurance Corporation Notes to the Financial Statements

The amortized cost and estimated fair value of U.S. Treasury obligations at December 31, 2025, by contractual maturity, are shown below:

| <i>(Dollars in thousands)</i> | Amortized Cost | Estimated Fair Value |
|---------------------------------------|-------------------|-------------------------|
| Due in one year or less | \$ 1,674,765 | \$ 1,673,378 |
| Due after one year through five years | 6,465,380 | 6,541,138 |
| | \$ 8,140,145 | \$ 8,214,516 |

Note 4: Premiums, the Secure Base Amount and Excess Insurance Fund Balances

Each System bank which issues insured obligations under subsection (c) or (d) of section 4.2 of the Farm Credit Act is an insured System bank and is required to pay premiums to the Corporation.

The Farm Credit Act sets a secure base amount (SBA) for the Insurance Fund to achieve. The statutory SBA is equivalent to 2 percent of the aggregate outstanding insured obligations of all insured System banks (adjusted downward by a percentage of the guaranteed portions of principal outstanding on certain government-guaranteed loans and investments) or such other percentage as determined by the Corporation in its sole discretion to be actuarially sound to maintain in the Insurance Fund taking into account the risk of insuring outstanding insured obligations.

The Farm Credit Act requires FCSIC to assess premiums based on each bank's pro rata share of insured debt (rather than on individual loans). FCSIC may collect from 0 to 20 basis points annually on adjusted insured debt outstanding. The Farm Credit Act also authorizes a risk surcharge of up to 10 basis points on nonaccrual loans and on other-than-temporarily impaired investments. The Farm Credit Act reduces the total insured debt on which premiums are assessed by 90 percent of Federal government-guaranteed loans and investments and 80 percent of state government-guaranteed loans and investments and deducts similar percentages of such guaranteed loans and investments when calculating the SBA.

Insurance premium rates are reviewed at least semiannually. For 2025, the board of directors set premium accrual rates on February 11, 2025 at 10 basis points on average adjusted insured debt and an assessment of a 10 basis point surcharge on the average principal balance outstanding for nonaccrual loans and other-than-temporarily impaired investments. The board of directors again reviewed premiums at its July 9, 2025 meeting and voted to maintain the premium accrual rate on average adjusted insured debt at 10 basis points and continued the assessment of 10 basis points for nonaccrual loans and other-than-temporarily impaired investments. In 2025, outstanding insured obligations increased by \$31.8 billion (7.1 percent). At December 31, 2025, the total Insurance Fund was 2.05 percent of adjusted insured obligations.

For 2024, the board of directors set premium accrual rates at its February 7, 2024 meeting at 10 basis points on average adjusted insured debt and an assessment of a 10 basis point surcharge on the average principal balance outstanding for nonaccrual loans and other-than-temporarily impaired investments. The board of directors again reviewed premiums at its July 10, 2024 meeting and voted to maintain the premium accrual rate on average adjusted insured debt at 10 basis points and continued the assessment of 10 basis points for nonaccrual loans and other-than-temporarily impaired investments. In 2024, outstanding insured obligations increased by \$32.5 billion (7.8 percent). At December 31, 2024, the total Insurance Fund was 2.02 percent of adjusted insured obligations.

Farm Credit System Insurance Corporation Notes to the Financial Statements

The Farm Credit Act requires if, at the end of any calendar year, the aggregate of the amounts in the Insurance Fund exceed the SBA, the Corporation is required to allocate to the Allocated Insurance Reserves Accounts (AIRAs) any excess balances less the amount that the Corporation, in its sole discretion, determines to be the sum of the estimated operating expenses and estimated insurance obligations of the Corporation for the immediately succeeding calendar year.

The total Insurance Fund exceeded the 2 percent SBA at December 31, 2025 by \$229.5 million, and after subtracting planned operating expenses of \$5.6 million for 2026, \$223.9 million was allocated to the AIRAs. The total Insurance Fund exceeded the 2 percent SBA at December 31, 2024 by \$81.9 million, and after subtracting planned operating expenses of \$5.3 million for 2025, \$76.6 million was allocated to the AIRAs.

The AIRAs' balances are recorded as part of the Insurance Fund until approved for payment by the Corporation's board of directors. AIRAs' balances may be used to absorb any insurance losses and claims. Furthermore, the board of directors has discretion to limit or restrict the AIRAs' payments.

Note 5: Operating Lease

The Corporation is committed under a ten-year lease with the FCS Building Association for office space expiring on November 30, 2035. The Corporation recognizes the right-of-use asset, and liability, initially measured at the present value of the lease payments. Additionally, the Corporation recognizes a single lease expense, which is allocated over the lease term, generally on a straight-line basis.

The lease liability and right-of-use asset are measured, using the current risk-free rate. Additionally, the Corporation has not separated lease and non-lease components under its office space lease.

Office space payments are due on the first day of every month and the Corporation paid lease payments of approximately \$163 thousand for the year ended December 31, 2025, which were reported in the accompanying Statements of Income and Expenses and Changes in Insurance Fund. The lease contains fixed payments which increase by 3% annually and does not include a current option to extend or renew beyond the current terms.

As of December 31, 2025, remaining maturities of lease liabilities approximated were as follows:

*Years ending December 31,
(Dollars in thousands)*

| | | |
|------|----|-----|
| 2026 | \$ | 152 |
| 2027 | | 156 |
| 2028 | | 161 |
| 2029 | | 166 |
| 2030 | | 171 |
| 2031 | | 176 |
| 2032 | | 181 |
| 2033 | | 186 |
| 2034 | | 192 |
| 2035 | | 181 |

Farm Credit System Insurance Corporation Notes to the Financial Statements

| | |
|--|-------------------------|
| Total operating lease payments | \$ 1,720 |
| Less: imputed interest | (331) |
| <hr/> Total operating lease liabilities | <hr/> \$ \$1,389 |

Since the Corporation has only one lease as of December 31, 2025, the weighted-average lease term remaining is approximately 10 years. Because the Corporation does not have access to the rate implicit in the lease, the Corporation utilized the risk-free rate of 4.2% (the borrowing rate as of August 2025) as the discount rate. Likewise, the weighted average discount rate as of December 31, 2025 was 4.2%.

As of December 31, 2025, the Corporation recorded a right-of-use asset of approximately \$1,387 thousand and related lease liability of approximately \$1,389 thousand in the accompanying Statements of Financial Condition.

Note 6: Line of Credit

On September 24, 2013, the Corporation entered into an agreement with the Federal Financing Bank (the FFB), a United States government corporation subject to the supervision and direction of the U.S. Treasury. Pursuant to this agreement, as amended, the FFB would advance funds to the Corporation under certain limited circumstances. The Corporation would use these funds to increase its capacity to provide assistance to the System banks in exigent market circumstances that threaten the banks' ability to pay maturing debt obligations. The agreement provides for a short-term revolving credit facility of up to \$10 billion and will remain in full force and effect until terminated by either the Corporation or the FFB. Under the agreement, each provision of funds by the FFB is subject to certain terms and conditions. The interest rate for each advance will be established by the FFB at the time the respective advance is made. Each advance cannot have a maturity date longer than twelve months. The Corporation paid no commitment fee to secure this line of credit. There were no amounts drawn on this line of credit during 2025 and 2024 and no outstanding balance due as of December 31, 2025 and 2024.

Note 7: Retirement Plan

All permanent Corporation employees are covered by the Federal Employees Retirement System (FERS). The Corporation's contribution was 18.4 percent of base pay for 2025. In addition, the Corporation automatically contributes 1 percent of base pay to the employee's Thrift Savings Plan account, matches the first 3 percent contributed by the employee, and matches one-half of the next 2 percent contributed by the employee. The Corporation also offers a 401K plan for employees. The Corporation automatically contributes 1 percent of base pay to the employee's 401K account and matches the first 2 percent contributed by the employee. Retirement plan expenses amounted to \$623 thousand in 2025 and \$591 thousand in 2024.

Note 8: Related Parties

The Corporation purchases services from FCA under an Interagency Agreement, including examination and administrative support services. The intention of the parties as stated in the agreement is that specified rates and fees will reimburse the party providing services for all reasonable costs associated with provision of the services. The Corporation purchased services for 2025 which totaled \$340 thousand, compared with \$321 thousand for 2024. At December 31, 2025 and 2024, there were no amounts included in the accompanying Statements of Financial Condition which were due to FCA for services.

Farm Credit System Insurance Corporation Notes to the Financial Statements

The Corporation may also provide services to FCA under an Interagency Agreement; however, the Corporation provided no services and recognized no revenue for 2025 and 2024. At December 31, 2025 and 2024, the Corporation did not have any receivables from FCA.

Note 9: Subsequent Events

FCSIC evaluated subsequent events from the date of the statement of financial condition through February 13, 2026, the date at which FCSIC's financial statements were issued. No material subsequent events were identified for either recognition or disclosure.

Management's Report on Internal Control Over Financial Reporting

The Farm Credit System Insurance Corporation's (FCSIC) internal control over financial reporting is a process effected by those charged with governance, management, and other personnel, designed to provide reasonable assurance regarding the preparation of reliable financial statements in accordance with generally accepted accounting principles in the United States of America. Our internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect our transactions and dispositions of our assets; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles in the United States of America and that receipts and expenditures of FCSIC are being made only in accordance with authorizations of FCSIC management and those charged with governance; and (3) provide reasonable assurance regarding prevention, or timely detection and correction, of unauthorized acquisition, use, or disposition of FCSIC's assets that could have a material effect on our financial statements.

Management of FCSIC is responsible for designing, implementing, and maintaining effective internal control over financial reporting. Management assessed the effectiveness of FCSIC's internal control over financial reporting as of December 31, 2025 based on the criteria established under 31 U.S.C. 3512(c),(d)(commonly known as the Federal Managers' Financial Integrity Act (FMFIA)) Based on that assessment, management concluded that, as of December 31, 2025, FCSIC's internal control over financial reporting is effective.

Internal control over financial reporting has inherent limitations. Internal control over financial reporting is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Internal control over financial reporting also can be circumvented by collusion or improper management override. Because of its inherent limitations, internal control over financial reporting may not prevent, or detect and correct, misstatements. Also, projections of any assessment of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

MANAGEMENT ASSURANCES

February 15, 2026

The management of the Farm Credit System Insurance Corporation is responsible for managing risk and maintaining effective internal control to meet the objectives of sections two and four of the Federal Managers' Financial Integrity Act.

FCSIC is an independent U.S. government-controlled corporation. Our primary purpose is to insure the timely payment of principal and interest on insured debt obligations issued on behalf of Farm Credit System banks.

The System is a nationwide government-sponsored enterprise of cooperative lending institutions owned by the agricultural and rural customers it serves. By protecting investors, we help maintain a dependable source of funds for the farmers, ranchers, and other borrowers of the System.

FCSIC actively monitors and manages insurance risk to minimize the Farm Credit Insurance Fund's exposure to potential losses. When appointed by the Farm Credit Administration, we also serve as receiver or conservator of any System bank or association.

Our management has completed an assessment of the effectiveness of FCSIC's enterprise risk management and internal control systems in effect during 2025 in accordance with guidelines provided by the Office of Management and Budget (OMB) in consultation with the comptroller general (OMB Circular A-123, Management's Responsibility for Enterprise Risk Management and Internal Control). The objective of these controls and systems is to provide reasonable assurance that

- obligations and costs comply with applicable laws;
- assets are safeguarded against waste, fraud, unauthorized use, and mismanagement;
- revenues and expenditures applicable to our operations are recorded and accounted for properly; and
- financial and statistical reports are reliable, complete, and timely.

On the basis of established guidelines and the assessment performed, we can provide reasonable assurance that internal control over operations, reporting, and compliance was operating effectively as of December 31, 2025.

In addition, as stated in the accompanying report, FCSIC's independent auditor, Sikich CPA, LLC, indicated that the financial statements of the Farm Credit Insurance Fund as of December 31, 2025, are fairly presented in all material respects. They also conducted testing on the effectiveness of FCSIC's internal control over financial reporting and issued an opinion that it was effective in all material aspects.

COMPLIANCE WITH THE FEDERAL CIVIL PENALTIES INFLATION ADJUSTMENT ACT IMPROVEMENTS ACT OF 2015

FCSIC has authority under section 5.65(c) of the Farm Credit Act (12 U.S.C. 2277a-14) to impose civil money penalties against a Farm Credit System bank that willfully fails or refuses to file any certified statement or pay any required premium.

In addition, section 5.65(d) of the Farm Credit Act prohibits any person convicted of any criminal offense involving dishonesty or a breach of trust to serve as a director, officer, or employee of any System institution, except with the prior written consent of FCA. This section also authorizes FCSIC to recover penalties for a willful violation of this prohibition. Sections 5.65(c) and (d) provide for a penalty of not more than \$100 for each day during which the violation continues.

The Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (the 2015 Act) amended the Federal Civil Penalties Inflation Adjustment Act of 1990 (28 U.S.C. 2461 note) to provide for regular evaluation of civil penalties. It also required every applicable federal agency to adopt, through an interim final rule, a one-time catch-up adjustment to be effective no later than August 1, 2016, with annual adjustments thereafter.

On January 14, 2025, FCSIC published a final rule making the annual adjustment required by the 2015 Act. The 2025 adjustment increased FCSIC's civil money penalties to not more than \$264 for each day during which a violation continues (90 Fed. Reg. 2922).

PERFORMANCE MANAGEMENT PROGRAM

FCSIC's mandate is to insure the timely payment of principal and interest on insured Farm Credit System debt securities and to serve as receiver or conservator when appointed by the Farm Credit Administration board. FCSIC carries out its insurance program mission through three program areas: (1) Insurance Fund and financial management, (2) risk management, and (3) receivership, conservatorship, and assistance readiness.

We have implemented performance measures to help us evaluate the effectiveness of these program areas. It is important to note that some of these measures use management estimates that may be affected by the performance and condition of System institutions. Also, unforeseen events may have a material effect on performance measures over time.

Performance Measures

1. Building and Managing the Fund to Protect Investors

The solvency of the Insurance Fund depends in part on the Corporation using its authorities to adjust insurance premium assessments when appropriate and effectively managing assets to ensure investment returns are maximized, while maintaining appropriate liquidity to carry out its mission. Congress established a statutory requirement for the Insurance Fund to be maintained at a SBA equal to 2 percent of adjusted insured obligations or such other percentage as the Corporation in its sole discretion determines to be actuarially sound.

The Corporation assesses the effectiveness of its performance in achieving this goal through the following:

- Reviewing, at least semiannually, the need for adjustments to insurance premium assessment.
- Measuring investment performance using reasonable qualitative and/or quantitative benchmarks.
- Maintaining the Insurance Fund at the statutory SBA, 2 percent of adjusted outstanding insured obligations. Maintaining the Insurance Fund at the SBA is affected by events beyond the control of the Corporation such as insurance losses that arise from troubled System institutions or growth in insured obligations exceeding FCSIC's ability to increase the Insurance Fund at the same rate because of statutory limits on premium assessments.
- Performing an annual assessment of the effectiveness of FCSIC's enterprise risk management and internal control systems in accordance with guidelines provided by Office of Management and Budget to implement the Federal Manager's Financial Integrity Act (FMFIA). This assessment supports management's assurance statement.
- Maintaining clean or unmodified audit opinions from our independent auditors, free from any material weaknesses.
- Developing and maintaining updated draft statements of work for business consulting and resolution activities, updated listings of vendors and consultants with resolution

experience, and access to government contracting resources like the General Services Administration (GSA) System for Award Management (SAM) to ensure quick execution of new contracts during a resolution period.

- Participating in frequent meetings with third-party service providers, including FCA, to ensure contracted services remain capable of providing support to FCSIC, including executing key functions such as supporting expedited hiring activities.

2. Protecting the Fund from Losses

FCSIC monitors and manages insurance risk to minimize the Insurance Fund's exposure to potential losses. In the event a System bank is unable to timely repay insured debt obligations for which it is primarily liable, the Corporation must expend amounts in the Insurance Fund to the extent available to insure the timely payment of principal and interest on the insured obligations. FCSIC monitors and independently analyzes conditions in the general economy, capital markets, and agricultural and financial sectors to identify potential risks to the System and the Insurance Fund. FCSIC analyzes and evaluates the financial performance and condition of System institutions, maintains ongoing dialogue with FCA examiners, and reviews reports of examination. When necessary, the FCSIC Board of Directors authorizes special examinations at System institutions of concern. On a quarterly basis, FCSIC screens all System institutions against key performance criteria to identify institutions that may pose an insurance risk.

Program effectiveness is measured by the extent that emerging problems are promptly detected and insurance losses minimized. This includes effective use of financial indicators to monitor conditions and trends, and effective analysis and reporting before any need to reserve for losses.

In accordance with generally accepted accounting principles, the Corporation must recognize an allowance for loss on its financial statements if a loss is probable and can be reasonably estimated. Timely evaluation of the Insurance Fund's risk exposure is critical to the determination of steps needed to preserve the Insurance Fund's solvency. In accordance with the Corporation's Policy Statement Concerning Allowance for Insurance Fund Losses, management assesses the need for an allowance at least quarterly using criteria specified in FCSIC's Allowance for Loss procedure.

3. Maintaining Receivership, Conservatorship, and Assistance Readiness

The Corporation is required to serve as receiver or conservator of System banks and associations when appointed by FCA. Additionally, the FCSIC Board may provide assistance to one or more System institutions to prevent placing an institution into receivership, restore an institution to normal operation, or stem financial contagion within the System. This goal requires that corporate readiness be maintained through periodic staff training, periodic review of potential strategies and procedures, and evaluation of potential resources available to ensure that sufficient qualified resources can be employed should the need arise.

The effectiveness of readiness efforts will be measured by the following:

- Maintaining a line of credit with the Federal Financing Bank to be available for use as additional FCSIC assistance to System banks in exigent market circumstances.
- Conducting training exercises with System banks and the Funding Corporation at least every two years regarding liquidity assistance procedures in exigent market circumstances and reviewing contact information and documentation annually.
- Timely reviewing and updating policies and procedures related to receiverships, conservatorships, and assistance in accordance with the Corporation's bylaws.
- Engaging with other federal insurers (e.g., FDIC, NCUA) for training, support, and sharing of best practices on at least an annual basis.
- Developing and maintaining a multi-year plan that identifies priority areas for receivership, conservatorship, and assistance readiness enhancement considering the stress scenarios that are considered the most likely and would require an immediate response, consistent with FCSIC's available resources.

The effectiveness of receivership, conservatorship, and assistance operations, if required, will be measured by the following:

- Completing initial processing of all claims within a period to be specified in accordance with the size and complexity of the individual case.
- Operating costs as a percentage of total assets.
- Actual asset recovery returns as a percentage of net realizable asset values.
- Exit of a conservatorship within a period to be specified in accordance with the initial plan of conservatorship.
- Completing analysis, Board recommendations, and execution of approved assistance requests within a time period that allows the assistance to have the potential to be effective.
- Effectiveness of any such assistance to avoid additional claims on the Insurance Fund.

FCSIC did not have any assistance requests and were not appointed as a receiver or conservator in 2025.

Strategic Goals and Objectives

The Government Performance and Results Act of 1993, as amended, requires most federal government organizations to report on the results of program performance. Performance results are included in regular reports to the board of directors and in FCSIC's annual report. Information for each of the three major program areas is presented in Table 4.

Table 4

Strategic Goals and Objectives by Program Area

| FCSIC's Mission | Program Area | Strategic Goals | Strategic Objectives | For More Information |
|---|--|---|--|--|
| <p>Protect investors in insured Farm Credit System obligations and taxpayers through sound administration of the Insurance Fund.</p> <p>Exercise its authorities to minimize Insurance Fund loss.</p> <p>Help ensure the future of a permanent system for delivery of credit to agricultural borrowers.</p> | <p>Insurance Fund and financial management</p> | <p>Manage the Insurance Fund to maintain the SBA in order to provide protection for investors and taxpayers against identified risks.</p> | <ol style="list-style-type: none"> 1. Manage the Insurance Fund to ensure adequate liquidity while optimizing investment returns and ensuring premium collections and refunds reflect anticipated changes in adjusted insured debt levels and potential insurance claims. 2. Use actuarial and risk management tools to evaluate the adequacy of investor protections and risk exposures to the Insurance Fund. 3. Communicate accurate and easily understood information about the insurance program to Congress, the public, insured investors, federal agency partners, and System institutions. | <p>See pages 17–24 for 2025 results.</p> |
| | | <p>Maintain effective internal controls and financial reporting.</p> | <ol style="list-style-type: none"> 1. Obtain clean or unmodified audit opinions and a control environment free of material weaknesses. | |
| | | <p>Maximize effectiveness of contracting.</p> | <ol style="list-style-type: none"> 1. Ensure FCSIC follows best practices in contracting including maintaining the capability to quickly engage third parties, including intergovernmental resources or contractors, as necessary to respond to a crisis situation. | |

Ensure that System banks have adequate temporary liquidity in situations where external market factors make normal debt market access extremely doubtful. <li data-bbox="781 934 1101 1123">3. Subject to the provisions of the Farm Credit Act, including the least-cost test, provide assistance when appropriate to a System bank. <li data-bbox="781 1159 1101 1507">4. If appointed as receiver or conservator of a System institution, ensure receiverships and conservatorships are managed to fulfill the purposes of the Farm Credit Act, protect creditors, and are terminated in an orderly and timely manner. | See pages 32–33 for 2025 results. |

GLOSSARY

Farm Credit Act — The Farm Credit Act of 1971, as amended, (12 U.S.C. 2001 *et seq.*) is the statute under which the Farm Credit System, FCSIC, and the Farm Credit Administration operate.

Farm Credit Administration (FCA) — FCA was established in 1933 to regulate the System. It is governed by a three-member presidentially appointed board. To ensure the safety and soundness of the System, FCA examines and supervises System institutions and develops regulations to govern them.

Federal Farm Credit Banks Funding Corporation — Based in Jersey City, New Jersey, the Funding Corporation manages the sale of Systemwide debt securities to finance the loans made by System institutions. It uses a network of bond dealers to market the System's securities.

Financial Institution Rating System (FIRS) — The FIRS is similar to the Uniform Financial Institutions Rating System used by other federal banking regulators except that the FIRS reflects the nondepository nature of System institutions. The FIRS provides a general framework for assimilating and evaluating all significant financial, asset quality, and management factors to assign a composite rating to each System institution. The ratings are described below.

Rating 1 — Institutions in this group are basically sound in every respect; any negative findings or comments are of a minor nature and are anticipated to be resolved in the normal course of business. Such institutions are well managed, resistant to external economic and financial disturbances, and more capable of withstanding the uncertainties of business conditions than institutions with lower ratings. Each institution in this category exhibits the best performance and risk management practices for its size, complexity, and risk profile. These institutions give no cause for regulatory concern.

Rating 2 — Institutions in this group are fundamentally sound but may reflect modest weaknesses correctable in the normal course of business. Because the nature and severity of deficiencies are not material, such institutions are stable and able to withstand business fluctuations. Overall risk management practices are satisfactory for the size, complexity, and risk profile of each institution in this group. While areas of weakness could develop into conditions of greater concern, regulatory response is limited to the extent that minor adjustments are resolved in the normal course of business, and operations continue in a satisfactory manner.

Rating 3 — Institutions in this category exhibit a combination of financial, management, operational, or compliance weaknesses ranging from moderately severe to unsatisfactory. When weaknesses relate to asset quality or financial condition, these institutions may be vulnerable to the onset of adverse business conditions and could easily deteriorate if weaknesses are not corrected. Institutions that are in significant noncompliance with laws and regulations may also be given this rating. Risk management practices are less than satisfactory for the size, complexity, and risk profile

of each institution in this group. Institutions in this category generally give cause for regulatory concern and require more than normal supervision to address deficiencies. Overall strength and financial capacity, however, still make failure only a remote possibility if corrective actions are taken.

Rating 4 — Institutions in this group have an immoderate number of serious financial or operating weaknesses. Serious problems or unsafe and unsound conditions exist that are not being satisfactorily addressed or resolved. Unless effective actions are taken to correct these conditions, they are likely to impair future viability or constitute a threat to the interests of investors, borrowers, and stockholders. Risk management practices are generally unacceptable for the size, complexity, and risk profile of each institution in this group. A potential for failure is present but is not yet imminent or pronounced. Institutions in this category require close regulatory attention, financial surveillance, and a definitive plan for corrective action.

Rating 5 — This category is reserved for institutions with an extremely high, immediate, or near-term probability of failure. The number and severity of weaknesses or unsafe and unsound conditions are so critical as to require urgent external financial assistance. Risk management practices are inadequate for the size, complexity, and risk profile of each institution in this group. In the absence of decisive corrective measures, these institutions will likely require liquidation or some form of emergency assistance, merger, or acquisition.

Government-sponsored enterprise (GSE) — A GSE is typically a federally chartered corporation created by Congress that is privately owned, designed to provide a source of credit nationwide, and limited to servicing one economic sector. Each GSE has a public or social purpose. GSEs are usually created because the private markets did not satisfy a purpose that Congress deems worthy — either to fill a credit gap or to enhance competitive behavior in the loan market. Each is given certain features or benefits (called GSE attributes) to allow it to overcome the barriers that prevented purely private markets from developing. The System is the oldest financial GSE.

ACRONYMS AND ABBREVIATIONS

| | |
|---------------------|---|
| AIRAs | allocated insurance reserves accounts |
| CIPA | Contractual Interbank Performance Agreement |
| Farm Credit Act | Farm Credit Act of 1971, as amended |
| FCA | Farm Credit Administration |
| FCS | Farm Credit System |
| FCSIC | Farm Credit System Insurance Corporation |
| FDIC | Federal Deposit Insurance Corporation |
| FIRS | Financial Institution Rating System |
| Funding Corporation | Federal Farm Credit Banks Funding Corporation |
| NCUA | National Credit Union Administration |
